CATHOLICISM IN THE UNITED STATES. The Catholic Almanac, for 1868, gives a glowing account of the increase of Romanism in this country. In 1860 the American Cyclopedia estimated the adherents of the Catholic Church at a little over 3,000,000. The best Catholic authorities are now said to Catholic authorities are now said to declare that nearly 5,000,000 of persons belong to their denomination. In Rhode Island and Connecticut alone the increase in sixteen years has been from 16,000 to 125,000. In the five New England States, exclusive of Massachusetts, the Catholic strength is 198,000. It is announced that special efforts are making to nationalize the Church. Heretofore the majority of the clergy have been French, Italian or Irish, and the number of native Americans who have entered the priesthood has been small.

The President of the Detroit Common Council is a good speller. The other day he appointed committees on "hidrolix," "heith," "public bildings," "licenses," "markits," etc.

To the Dental Profession.

To the Dental Profession.

I HAVE PATENTED, and now desire to introduce, an important improvement in the construction of ARTIFI-CIAL DENTURES, whereby the strength, reliability and facility of repair, pertaining to swaged plate work, is communicated to moulded metalic or vulcanizable base. Streng Plate Teeth as firmly attached to the base as if soldered to swaged plate, are, by this process, substituted for those specially designed for moulded base. By their use the operator is left free to exercise his own judgment in their arrangement, and finds himself no longer confined to the sameness of the present style of blocks, or single teeth weakened by carving for moulded work.

No new appliances are required in this process. It is easily acquired by any one familiar with either moulded or swaged work. It gives to the operator confidence in the reliability of his cases, exempting him from the disappointment and perplexity often attendant on his most faithful efforts. It renders partial cases as reliable as full sets, and, consequently, will tend to ameliorate the present deplorable practice of extracting every tooth, sound or unsound, which stands in the way of the latter.

The method has been thoroughly tested,

Inter.

The method has been thoroughly tested, and is now submitted to the profession with the assurance that it will be found to fulfill all that is claimed for it. Its results are highly artistic, very beautiful, and afford the utmost satisfaction to operator and patient.

OFFICE LICENSES will be the system adopted, in relation to which—and other matters in connection—circulars will be furnished, on application to the subscriber.
